

TIFFANY YEUNG

tiffanynweung.com | tiffanynweung@gmail.com | github.com/tiffanynweung

SKILLS

Languages

HTML, CSS, JavaScript (ES6),
Ruby, C++, C, Bash, Python,
Scheme, C#, VB

Frameworks

Sass/SCSS, Jekyll, React,
TypeScript, Bootstrap,
jQuery, .NET, Excel VBA

Tools

Git, Unix/Linux, Sketch, Abstract,
Photoshop, Illustrator, Figma,
InDesign

EDUCATION

University of Waterloo

Candidate for Honours Bachelor
of Computer Science, Co-op

ACTIVITIES

Clubs & Societies

Hack the North, UW MathSoc,
Humans vs Zombies Club,
Product Vision, reboot, UW UX

Interests

Playlist crafting, creative writing,
sketching wireframes, grinding
Diablo 3, playing and streaming
competitive Overwatch

EXPERIENCE

Front-End Developer | Shopify

Jan – Apr 2017

- Worked on a small team to build the public styleguide of [Shopify's design system Polaris](#), using TypeScript and React
- Led the implementation of the Polaris rebrand on Shopify admin dashboards, converting all UI components to follow the new design system
- Coordinated the Polaris design changes across the e-commerce platform, acting as a primary contact for information on the brand refresh and organizing multiple developers working on the desktop and mobile interfaces
- Refactored existing Ruby UI components to facilitate their move to an internal gem, enabling the use of Shopify UI assets in existing and future projects
- Created the API, styling, and documentation of new Ruby UI components used throughout Shopify admin dashboards

Web Developer | Toronto District School Board

May – Aug 2016

- Developed a public-facing financial report database in ASP.NET and C# that allows end users to manage hundreds of documents
- Conducted UX analysis on external site UI, reporting critical issues, comparing against site UI/UX of several competitors, and providing solutions based on extrapolated results
- Automated spreadsheet data cross-referencing and CSS file generation with Excel VBA macros, reducing time taken by 50% and allowing for 150+ generated themes

PROJECTS

TY Designs

Dec 2015 – Present

- Developed websites on commission as a freelance web designer along with hosting an [open-source repository of Tumblr themes](#) for public use
- Built projects with HTML, CSS + Sass, JavaScript, jQuery, Bootstrap, and Jekyll, along with the use of Git and Chrome Dev Tools
- Generated 3000+ views on themes within a month, with individual designs receiving 1000+ downloads within a week of release
